I'm Desiree, and I am mom and learning coach to three

00:00:08.382

children that are going through the K12 online school system.

00:00:12.720

Just like any mom, I'm getting the kids up and rolling out of bed, breakfast,

00:00:17.620

and then everyone checks their emails.

00:00:21.120

And then they all check their class connect schedules, and

00:00:24.671

then I always have a capability to see all of their class connect schedules as well.

00:00:29.655

And just to see whose gonna be doing what
and kinda have an outline of the day.

00:00:37.620

Then, as everyone is going
through their school process,

00:00:40.430

then I pop in periodically,
just to see how everyone's doing.

00:00:45.750

Making sure they're really paying
attention and focused through their class,

00:00:49.990

and if they have questions then
I'm always accessible to them.

00:00:54.334

For the parent, or a learning coach, the
full engagement day is really gonna vary.

00:01:01.480

Right now there's a lot of
independence from their part,

00:01:04.780

we've been doing this system for
a long time.

00:01:07.250

But I would say an average is probably
anywhere between two and four hours a day.

00:01:11.820

Then it also is nice to be able to monitor how everyone's feeling.

00:01:16.260

So, how progress is going, if there's a little slump in the day for example,

00:01:20.185

that might be where I encourage to take a little break.

00:01:22.355

Maybe give it some outside time through something that

00:01:24.965

kind of gives a little refresh for the day.

00:01:27.545

Sometimes kids who would rather be doing something else,

00:01:30.775

you just keep encouraging them to keep going with their day.

00:01:35.435

Elayna will average probably about six hours of school time a day

00:01:40.960

and sometimes she knocks it out all really quickly, and

00:01:45.180

sometimes she takes little
longer breaks during the day.

00:01:48.010

So when Elayna goes through her classes,
if for

00:01:51.016

some reason she's doing her work
after the class connect and

00:01:54.949

hasn't gotten a chance to ask the teacher,
she has options.

00:01:58.975

She can also, go into extra study time,

00:02:02.520

if the kids can reach out and
go through specific problems,

00:02:07.736

and then of course,
she can ask her learning coaches too.

00:02:13.590

I feel as though the online system has
helped her make herself very independent.

00:02:21.130

She knows what she needs to do, she knows
how to log on, she knows how to get to her

00:02:25.730

class connects,

she knows what assignments are due.

00:02:29.450

It's the ideal of knowing that
your child is growing with it.

00:02:33.090

And I think that's gonna be really
important in the workforce as they get

00:02:37.620

older.

00:02:38.149

As you're starting into the program
it's gonna be possibly something very

00:02:42.140

new to you.

00:02:43.180

There's a lot of learning process
that comes along with that,

00:02:45.300

that curve could take a little while.

00:02:47.170

I would say if you haven't fault like
you're really comfortable into it, for

00:02:51.943

maybe even a few months, give it time.

00:02:54.341

People say I don't know how you do it,
I can never do that.

00:02:59.070

But you can

and then I always have a capability to see

and kind of have an outline of the day.

Then, as everyone is going through their school process,

00:00:40.429

00:01:01.509

Right now, there's a lot of independence from their part.

We've been doing this system for a long time,

monitor how everyone's feeling,

00:01:16.023

so how progress is going.

00:01:18.215

If there's a little slump in the day, for example,

00:01:20.070

that might be where I encourage to take a little break.

Maybe get in some outside time,

00:01:24.143

do something that kind of

00:01:25.223

gives a little refresh for the day.

00:01:27.463

You know, sometimes kids would rather

00:01:28.853

be doing something else,

00:01:31.266

you just keep encouraging them to keep going with their day.

00:02:21.136

She knows what she needs to do,

00:02:22.895

she knows how to log on,

00:02:24.708

she knows how to get to her Class Connects,

00:02:26.799

she knows what assignments that are due.
